

Wheel Grip

YOUR TRACTION ALLY, ON THE ROAD AND ON THE JOB SITE

When your truck loses traction, the WHEEL GRIP system is designed for both light-duty and heavy-duty trucks. Quick and easy to install, it provides the grip you need in challenging conditions. Whether you're on the road or on a job site—on snow, ice, mud, or sand—it will get you out of trouble quickly.

Never lose traction on the road.

SOUDEL has designed its traction plates to be strong and reliable. Made of steel with quality craftsmanship, these traction plates are built to last for many years. They help avoid losing time if you get stuck on a slippery surface and will get you back on the road quickly.

*** If there are fenders, always check the clearance between the tire and the fender.

Our products
